### EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

## Permit Nos. 5628 and PSD-TX-905

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3)  $NO_x$  total oxides of nitrogen
  - CO carbon monoxide
  - VOC volatile organic compounds as defined in 30 Texas Administrative Code Section 101.1
  - SO<sub>2</sub> sulfur dioxide
- PM particulate matter, suspended in the atmosphere, including  $PM_{10}$ .
- $PM_{10}$  particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall
- be assumed that no particulate matter greater than 10 microns is emitted.
  - HCHO formaldehyde
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- \* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

<u>24  </u> Hrs/day <u> 7  </u> Days/week <u> 52  </u> Weeks/year or <u>8,760 </u> Hrs/ye		24	Hrs/day	7	Days/week	52	Weeks/year o	r <u>8,760</u>	Hrs/yea
---	--	----	---------	---	-----------	----	--------------	----------------	---------

\*\* Annual emission limits are based on a combined total for several points. The annual limit is specified after the last point in the group.
