EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 4371

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) VOC volatile organic compounds as defined in 30 Texas Administrative Code Section 101.1 PM particulate matter, suspended in the atmosphere, including PM₁₀.
- PM₁₀ particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall

be assumed that no particulate matter greater than 10 microns is emitted.

- (4) Fugitive emissions are an estimate only.
- * Emission rates are based on and the facilities are limited by the following maximum operating schedule:

8.0 Hrs/day 6.0 Days/week 50 Weeks/year or 2,400 Hrs/year

** Compliance with annual emission limits is based on a rolling 12-month period.

Maximum annual unfinished lumber throughput is 35,000,000 board feet/year
