EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 6979B

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

| Emission | Source | Air Contaminant | Emission Rates * | |
|---------------|----------------------------|-------------------------|------------------|----------------|
| Point No. (1) | Name (2) | Name (3) | lb/hr | <u>TPY</u> |
| 1 | Cyclone Stack | TSP PM ₁₀ | 6.36 6.36 | 17.85 17.85 |
| F-1 | Cyclone Load Out Point (4) | TSP PM ₁₀ | | 1.42 0.68 |
| F-2 | Gluing Point (4) | VOC | 1.93 | 5.48 |

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) TSP total suspended particulate including PM_{10}
 - PM₁₀ particulate matter less than 10 microns
 - VOC volatile organic compounds as defined in General Rule 101.1
- (4) Fugitive emission rates are an estimate only and should not be considered as a maximum allowable emission rate.
- * Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day 18 Days/week 6 Weeks/yr 52 or 5,616 Hrs/yr.

A maximum annual throughput of 24,000,000 board feet of lumber processed.
