EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Numbers 92350 and PSDTX1218

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) VOC volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

NO_x total oxides of nitrogen

sulfur dioxide SO_2

РМ particulate matter, suspended in the atmosphere, including PM₁₀ and PM_{2.5}

particulate matter equal to or less than 10 microns in diameter PM₁₀ particulate matter equal to or less than 2.5 microns in diameter PM_{2.5} -

- carbon monoxide CO HCI - hydrogen chloride HF - hydrogen fluoride

- mercury Hg

H₂CO - formaldehyde

Pb lead

H₂SO₄ - sulfuric acid - ammonia NH_3

COS - carbonyl sulfide

H₂S - hydrogen sulfide

(4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

24 Hrs/day 7 Days/week 52 Weeks/year or 8,760 Hrs/year

** Compliance with annual emission limits is based on a rolling 12-month period.

Dated: December 28, 2010
