EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 21352

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) TSP total suspended particulate matter, including PM_{10} PM_{10} particulate matter less than 10 microns
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (a) Emission rates are based on and the facilities are limited to an hourly throughput of 25 tons and an annual throughput of 9,100 tons of grain and feed commodities.
- (b) Emission rates are based on and the facilities are limited to an hourly throughput of 2 tons and an annual throughput of 7,170 tons of grain and dry feed commodities.
- (c) Emission rates are based on and the facilities are limited to 8,521 vehicular miles traveled per year.
