EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 3275A

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) VOC volatile organic compounds as defined in 30 Texas Administrative Code Section 101.1

NO_x - total oxides of nitrogen

SO₂ - sulfur dioxide

PM - particulate matter, suspended in the atmosphere, including PM₁₀

PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.

CO - carbon monoxide

EO - ethylene oxide

PO - propylene oxide

BO - butylene oxide

HAPS - hazardous air pollutants

- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) Depending upon the Impacts Index which is defined in Special Condition No. 5, compounds will be vented either to the atmosphere at the individual tanks or loading spots or to the Scrubber (EPN APLNTSCB).
- (6) WWS Carbon Absorbers WWC-1 through WWC-10 emissions are accounted for under the total WWS carbon adsorber emissions.
- (7) Storage Tanks ST-900A through ST-2000 emissions are accounted for under the total storage tank emissions.
- (8) Loading Spots LD-A, LD-B, LD-C, RAIL, STRUCK, and WTRUCK emissions are accounted for under the total loading emissions.

*	Emission	rates	are	based	on	and	the	facilities	are	limited	by	the	following	maximum	operating
	schedule:														

**	These scrubber emissions do	not include potentia	emissions from tanks	and loading that are
	vented through the scrubber.	Controlled storage ta	ınk and loading emissi	ons are accounted for

under the annual total storage tank emissions and the annual total loading emissions.
