Permit No. 20162

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)		Emission Rates * bs/hr TPY

⁽¹⁾ Emission point identification - either specific equipment designation or emission point number from plot plan.

 NO_x - total oxides of nitrogen

CO - carbon monoxide

PM - particulate matter

⁽²⁾ Specific point source name. For fugitive sources use area name or fugitive source name.

⁽³⁾ VOC - volatile organic compounds as defined in General Rule 101.1

SO₂ - sulfur dioxide

Halocarbons- halogenated chlorofluorocarbons

- (4) Emission rates are summed for 2 operational boilers; 1 extra boiler is for backup only.
- (5) Emission rates are for a single generator.
- (6) Emission rates are summed for 2 boilers.
- (7) Emission rates are summed for all cooling towers.
- (8) Emission rates for hydrides are effective after January 15, 1996.
- * Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day 24 Days/week 7 Weeks/year 52 or Hrs/year 8,760
