Permit Number 21101

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Page 6

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source names. For fugitive sources use area name or fugitive source name.
- (3) BD butadiene
 - CO carbon monoxide
 - NO_x total oxides of nitrogen
 - PM₁₀ particulate matter (PM) equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no PM greater than or equal to 10 microns is emitted.
 - SO₂ sulfur dioxide
 - VOC volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1. Butadiene is not included as a VOC.
- (4) Emission rate is an estimate and compliance is demonstrated by meeting the requirements of the applicable special conditions and permit application representations.
- (5) Total emissions from any combination of EPNs E-01-1544, E-02-1544, E-03-1544, E-04-1544, E-05-1544, E-06-1544, E-07-1544, and E-01A-1544 shall not exceed the following after the staged combustion burner retrofit on the BA-113 Steam Superheater:

	<u>lbs/hr</u> <u>TPY</u>	
СО	508.27	2226.24
NO_x	143.59	629.00
PM_{10}	13.67	59.87
SO ₂ (6)	25.69	112.53
SO ₂ (7)	70.53	95.34
VOC	10.21	44.72

- (6) Natural gas
- (7) Refinery fuel gas
- (8) Pre emission control
- (9) Post emission control
