EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 74857

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) VOC volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

 NO_x - total oxides of nitrogen

SO₂ - sulfur dioxide.

CO - carbon monoxide

H₂S - hydrogen sulfide

- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) EPN 70 is limited to 355 hour per year for start-up, shutdown and maintenance emissions.
- (6) Flare-16 operations must cease 18 months from the date of permit issuance or cease once commencement of Acid Gas Reinjection System
- * Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Permit Number: 73363
