## Emission Sources - Maximum Allowable Emission Rates

## Permit Number 6322A

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Air Contaminants Data

| <b>Emission Point No. (1)</b> | Source Name (2)  | Air Contaminant Name                 | Emission Rates (5) |         |
|-------------------------------|--|--------------------------------------|--------------------|---------|
|                               |  | (3)                                  | lbs/hour           | TPY (4) |
| 1                             | Silo No. 1 vented through a<br>Baghouse                            | PM (PVC Resin)                       | 0.06               | 0.26    |
| 2                             | Silo No. 2 vented through a<br>Baghouse                            | PM (PVC Resin)                       | 0.06               | 0.26    |
| 3                             | Silo No. 3 vented through a<br>Baghouse                            | PM (Calcium<br>Carbonate)            | 0.06               | 0.26    |
| 5                             | Charge Bins 1 and 2 vented through Large Vacuum Blower with Filter | PM (PVC Resin and Calcium Carbonate) | 0.09               | 0.49    |
| 6                             | Charge Bins 3 and 4 vented through Large Vacuum Blower with Filter | PM (Assorted Minor Ingredients)      | 0.09               | 0.49    |
| 7                             | High Intensity Mixer vented through a Dust Collector               | PM (PVC Blend)                       | 0.17               | 0.75    |
| 8                             | Silo No. 5 vented through a<br>Baghouse                            | PM (PVC Blend)                       | 0.08               | 0.35    |
| 9                             | Silo No. 6 vented through a<br>Baghouse                            | PM (PVC Blend)                       | 0.04               | 0.19    |
| 10                            | Silos Nos. 7 and 9 vented through a Baghouse                       | PM (PVC Blend)                       | 0.04               | 0.19    |
| 11                            | Silo No. 8 vented through a<br>Baghouse                            | PM (PVC Blend)                       | 0.04               | 0.19    |
| 12                            | Silo No. 10 vented through a<br>Baghouse                           | PM (PVC Re-Grind)                    | 0.06               | 0.27    |
| 13                            | Re-Grinder vented through a<br>Cyclone                             | PM (PVC Re-Grind)                    | 0.30               | 0.72    |

Project Number: 289072

## Emission Sources - Maximum Allowable Emission Rates

| 14 | North Rail Load Out Silo vented through a Baghouse                 | PM (PVC Blend) | 0.13 | 0.56 |
|----|--|----------------|------|------|
| 15 | South Rail Load Out Silo vented through a Baghouse                 | PM (PVC Blend) | 0.04 | 0.19 |
| 17 | Railcar Unloading Push/Pull<br>System vented through a<br>Baghouse | PM (PVC Resin) | 0.15 | 0.68 |

- (1) Emission point identification number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) PM
  total particulate matter, suspended in the atmosphere, including PM<sub>10</sub> as represented
  total particulate matter equal to or less than 10 microns in diameter as represented
- (4) Compliance with annual emission limits (tons per year) is based on a 12-month rolling period.
- (5) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.

Date: October 3, 2006
