## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Nos. 22508 and PSD-TX-874

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

	Emission point identification - either specific equipment
-	nation or emission point number from plot plan.
	Specific point source name. For fugitive sources use area name or
	ive source name.
	VOC - volatile organic compounds as defined in General
Rule 101	
	- particulate matter
	- carbon monoxide
NO <sub>×</sub>	- nitrogen oxides
	- ammonia
	Fugitive emissions are an estimate only and should not be
	dered as a maximum allowable emission rate.
	Emissions do not include emergency releases to the flare.
(6)	Allowable emission rate until pump seals have been upgraded as
requi	red by Special Condition No. 9.
	ion rates are based on and the facilities are limited by the
follo	owing maximum operating schedule:
Hrs/d	lay Days/week Weeks/year or
Hrs/year	8,760
