## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

## Permit No. 35177

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

## AIR CONTAMINANTS DATA

| Emission                  | Source                                   | Air Contaminant     | <u>Emission</u> | Rates |
|---------------------------|--|---------------------|-----------------|-------|
| <u>*</u><br>Point No. (1) | Name (2)                                 | Name (3)            | lb/hr           | TPY   |
| 1                         | Pattern Shop Cyclone Sta                 | ck PM <sub>10</sub> | 0.34            | 0.21  |
| 2                         | Sand Silo Baghouse Stack                 | PM <sub>10</sub>    | 0.04            | 0.02  |
| FUG-1                     | 1,000-lb/hr Crucible Furnace (4)<br>0.05 |                     | $PM_{10}$       | 0.95  |
|                           | 0.03                                     | $NO_x$              | 1.00            | 0.20  |
|                           |  | CO                  | 0.21            | 0.04  |
|                           |  | SO <sub>2</sub>     | <0.01           | <0.01 |
| FUG-2                     | Electric Induction Furna 0.12            | ces (4)             | Zn              | 0.62  |
|                           |  | Pb                  | 0.62            | 0.12  |
|                           |  | Cu                  | 0.13            | 0.03  |
|                           |  | Sn                  | 0.15            | 0.03  |
| FUG-3                     | Molding Operation (4)                    | VOC                 | 1.0             | 0.25  |

<sup>(1)</sup> Emission point identification - either specific equipment designation or emission point number from plot plan.

SO<sub>2</sub> - sulfur dioxide

<sup>(2)</sup> Specific point source name. For fugitive sources use area name or fugitive source name.

<sup>(3)</sup> VOC - volatile organic compounds as defined in General Rule 101.1  $NO_x$  - total oxides of nitrogen

Permit No. 35177 Page 2

 $PM_{10}$  - particulate matter (PM) equal to or less than 10 microns in diameter. Where PM is not listed,

it shall be assumed that no particulate matter greater than 10 microns is emitted.

CO - carbon monoxide

Pb - lead and lead compounds

Zn - zinc and zinc compounds

Cu - copper and copper compounds

Sn - tin and tin compounds

(4) Fugitive emissions are an estimate only.

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

\* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

| 12 Hrs/day 6 Days/week 52 Weeks/year or Hrs/year |                      |        |  |  |
|--|----------------------|--------|--|--|
| <u>Metal</u>                                     | <u>Melt lbs/year</u> |        |  |  |
| Aluminum   | 715,000              |        |  |  |
| Manganese Bronze                                 | 120,000              |        |  |  |
| Aluminum Bronze                                  |                      | 30,000 |  |  |
| Leaded Bronze 123/844                            | 45,000               |        |  |  |
| Leaded Bronze 115/8360                           | 40,000               |        |  |  |
