## Emission Sources - Maximum Allowable Emission Rates

## Permit Number 56613, PSDTX706 and PSDTX709M1

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Air Contaminants Data

| Emission Point No. | Source Name (2)  | Air Contaminant Name (3)   | Emission I | Rates   |
|--------------------|------------------|----------------------------|------------|---------|
| (1)                |                  |                            | lbs/hour   | TPY (4) |
| STKBLR2            | Boiler No. 2     | VOC                        | 1.30       | 5.67    |
|                    |                  | NO <sub>x</sub>            | 12.96      | 56.76   |
|                    |                  | СО                         | 19.78      | 86.65   |
|                    |                  | SO <sub>2</sub>            | 0.14       | 0.62    |

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) VOC volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
  - NO<sub>x</sub> total oxides of nitrogen
  - SO<sub>2</sub> sulfur dioxide
  - PM total particulate matter, suspended in the atmosphere, including PM<sub>10</sub> and PM<sub>2.5</sub>, as represented
  - $PM_{10}$  total particulate matter equal to or less than 10 microns in diameter, including  $PM_{2.5}$ , as represented
  - PM<sub>2.5</sub> particulate matter equal to or less than 2.5 microns in diameter
  - CO carbon monoxide H<sub>2</sub>S - hydrogen sulfide
- (4) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.
- (5) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
- (6) Maximum allowable emission rates for maintenance, start-up, and shutdown, and reduced load (less than 30% operating capacity).
- (7) Standard Permit No. 101369 and PBR 101750 are referenced in NSR Permit No. 56613 and authorize EPN FLARE emissions in addition to quantities listed on the MAERT.
