#### Permit Number 4673B

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Air Contaminants Data

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates	
			lbs/hour	TPY (4)
DPP 30	A Dryer Scrubber	VCM	(6)	(6)
		VOC (8)	0.11	0.48
		Non-VCM HAP (9)	0.18	0.77
		PM	1.87	8.17

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) VCM vinyl chloride monomer

VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

HAP - hazardous air pollutant as listed in § 112(b) of the Federal Clean Air Act or Title 40 Code of

Federal Regulations Part 63, Subpart C

NO<sub>x</sub> - total oxides of nitrogen CO - carbon monoxide

PM - total particulate matter, suspended in the atmosphere, including PM<sub>10</sub> and PM<sub>2.5</sub>, as represented

PM<sub>10</sub> - total particulate matter equal to or less than 10 microns in diameter, including PM<sub>2.5</sub>

PM<sub>2.5</sub> - particulate matter equal to or less than 2.5 microns in diameter

SO<sub>2</sub> - sulfur dioxide

- (4) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.
- (5) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
- (6) Total for residual VCM emissions is 2.16 pounds per hour and 2.96 tons per year
- (7) Total VOC not including VCM and other hazardous air pollutants
- (8) VOC emissions due to combustion of natural gas.
- (9) Acetaldehyde and other unspeciated HAP due to decomposition reactions and the combustion of natural gas.
- (10) Acetaldehyde and other unspeciated HAP, not including VCM, due to decomposition reactions.
- (11) Total non-VCM VOC emissions is 0.18 tpv.
- (12) Unspeciated VOC other than VCM and methanol having a short term ESL ≥ 2ug/m³ and an annual ESL ≥ 10 percent of its short-term ESL.
- (13) VOC emissions include HAP
- (14) VOC emissions include VCM and non-VCM HAP
